

**JEFFERSON COUNTY
BOARD OF COUNTY COMMISSIONERS**

AGENDA REQUEST

TO: Board of County Commissioners

FROM: Chris Goy, Central Services Director

DATE: November 28, 2022

RE: Electrical and Backup Upgrade for New County Critical Information Technology Room (CRITR)

STATEMENT OF ISSUE: The Central Services Department is requesting Board of County Commissioners approval of a contract with Frederickson Electric, Inc. for an electrical and backup power upgrade at the new County Critical Information Technology Room located at the Port Hadlock Sheriff's Department Facility. The existing 250kW backup generator and electrical service at this location is insufficient to support the needs of the additional equipment necessary to fully implement a transition.

ANALYSIS: Currently, the County's server equipment is housed in the County Courthouse – a building with known vulnerabilities: it is not seismically survivable; it has no generator back-up power, etc. This was exemplified by the loss of critical County information systems during a recent powerful windstorm, which complicated the County's response to the weather emergency. Creating a central and secure server location will allow for future expansion while taking care of the County's immediate backup power and security concerns. In order to fully implement this plan, a number of electrical upgrades must take place to ensure long-term proper care of newly-acquired equipment. This essential work includes: upgrading the power service from the existing backup power generator, replacing an undersized backup power distribution panel, the installation of a new uninterruptible power source (UPS), and a new service bypass switch required for said new UPS.

This is a no-bid contract authorized due to the Board's November 21, 2022 designation of the CRITR as a "special facility."

FISCAL IMPACT: Two hundred sixty-nine thousand seven hundred sixty-five dollars and two cents (\$269,765.02).

RECOMMENDATION: Approval of the attached contract.

- p. Any failure to comply with reporting provisions of the insurance policies shall not affect coverage provided to the County, its officers, officials, employees, or agents.
- q. Contractor's insurance shall apply separately to each insured against whom claim is made or suit is brought, except regarding the limits of the insurer's liability.
- r. Contractor shall include all subcontractors as insured under its insurance policies or shall furnish separate certificates and endorsements for each subcontractor. All insurance provisions for subcontractors shall be subject to all the requirements stated.

All the insurance policies required by this Agreement shall provide that thirty (30) days before cancellation, suspension, reduction or material change in the policy, notice of same shall be given to the Jefferson County Risk Manager by registered mail, return receipt requested.

-Transfer switch programming and transfer testing will be performed by a Cummins factory representative. Includes one tech for one day on site during normal business hours.

-Allow for 1-2 weeks of loss of use of lights and outlets powered from the generator panel in the Sheriff's Office Electrical Room while the

new feeder, transformer, transfer switch, 225 Amp generator panel and associated wiring & components are being installed for the Electrical Room. The duration for this loss of use will be dependent on any issues encountered during the sub-feed replacement between the Jail and Sheriff's office and Cummins technician availability for programming and transfer testing. During this time all lights and power outlets powered by the Sheriff's Office generator panel will not work. This downtime will not impact any Jail electrical panels or generator backup capability to the Jail.

-Power to the Sheriff's Office will need to be temporarily shut down after hours to safely install the upgraded feeder from the electrical service to the generator transfer switch. This is due to the high current hazards present at the electrical service. The date and time of this work will be coordinated in advance to minimize impact.

-A timeframe of approximately 4 hours will need to be coordinated for loss of backup generator capability to the Jail while upgrading the generator output wiring to the breaker serving the Sheriff's Office. This will not impact normal utility power to the Jail, only the ability to run on backup power.

Heat Pump Circuits:

-Add two 30 Amp/208 Volt two-wire heat pump circuits from the 225 Amp electrical room generator panel to the roof mounted heat pump locations. Surface mounted conduit will be installed along the interior of the dormers between the attic and the fuseless disconnects being mounted on the exterior corner of the dormers.

-Add one 20A/120V circuit to a GFCI protected service receptacle on the roof. Receptacle will be integrated into one of the heat pump disconnects.

-Connect power between the fuseless disconnects and the heat pump units.
