BETWEEN

THE STATE OF WASHINGTON DEPARTMENT OF ECOLOGY

AND

JEFFERSON COUNTY PUBLIC HEALTH

This is a binding Agreement entered into by and between the state of Washington, Department of Ecology, hereinafter referred to as “ECOLOGY,” and Jefferson County Public Health, hereinafter referred to as the “RECIPIENT,” to carry out with the provided funds activities described herein.

GENERAL INFORMATION

Project Title:	Chimacum-Port Hadlock Pollution Identification and Correction Project
Total Cost:	\$407,074.00
Total Eligible Cost:	\$407,074.00
Ecology Share:	\$305,305.50
Recipient Share:	\$101,768.50
The Effective Date of this Agreement is:	01/01/2023
The Expiration Date of this Agreement is no later than:	12/31/2025
Project Type:	Nonpoint Source Activity

Project Short Description:

The RECIPIENT will implement a Pollution Identification and Correction (PIC) project for the Chimacum and Port Hadlock areas to protect water quality from threats of nonpoint source pollution. The RECIPIENT will monitor water quality for bacteria to identify areas of concern, followed by property research, corrective actions, and outreach to resolve pollution sources.

Project Long Description:

The Chimacum and Port Hadlock areas have been identified as high-priority locations for PIC projects in the 2014 Hood Canal Regional PIC (HCRPIC) Priority Work Plan. The RECIPIENT has found elevated levels of bacteria in Chimacum Creek and along the Port Hadlock shoreline through past water quality monitoring efforts. The estimated 90th percentile of Chimacum Creek E. coli is greater than 580 MPN/100 mL. Nearby Irondale Creek had an August 2021 geomean of 597 E. coli.

Agreement No: WQC-2023-JeCoPH-00032
Project Title: Chimacum-Port Hadlock Pollution Identification and Correction Project
Recipient Name: Jefferson County Public Health

Local residents have expressed considerable concern regarding water quality in this area. The area has commercial and recreational shellfish beds that have experienced emergency closures due to bacteria pollution sources in the past, along with a popular recreational swimming beach and several public water recreation sites. Commercial and recreational shellfish and water recreation are important elements of the local economy. Residents have a strong desire to maintain open shellfish growing areas and sustain safe water for recreation. This project will also illuminate the extent of pollution attributed to septic systems in an area proposed to be served by the Port Hadlock sewer system in the future.

The project area contains the greatest density of septic systems in Jefferson County; there are 2,477 active septic systems in county records. Of those, 25.6% are current on their Operations & Maintenance (O&M) inspections, and 7.2% are identified as deficient on the most recent O&M report or are in violation of county or state code. The Chimacum watershed also contains the highest number of agricultural lands in the county. There is a high potential for pollution from pasture flooding and animal manure in the wet season, though this effect has not been adequately studied to date.

The RECIPIENT will focus water quality monitoring in Chimacum Creek and along the shoreline in Port Hadlock. PIC work will be targeted based on the most recent monitoring results. Corrective actions will be taken when necessary at identified problem sites. The RECIPIENT will provide the homeowners with information regarding water quality monitoring results, septic system maintenance and care, financial assistance, and permit technical assistance. The RECIPIENT will provide rebates for certain OSS maintenance actions, such as inspections, riser installation, and minor repairs.

The RECIPIENT will partner with the JCCD to assist with water quality monitoring and source identification, develop a referral process for agricultural sites suspected to be bacterial sources, and coordinate on corrective actions. The JCCD will develop a Chimacum Watershed Management and Restoration Plan to address water quality issues, flooding, and invasive species in the Chimacum watershed.

Overall Goal:

This project will protect human health from risks of waterborne pathogens, keep shellfish beds open, and keep waters safe for recreation. Regular monitoring will identify areas of concern to help determine the impact on receiving waters from freshwater pollution sources. The status and condition of on-site septic systems in the project area will be assessed through sanitary surveys.

The RECIPIENT will quantify and correct nonpoint sources using approved PIC methodology. Staff will provide property owners with outreach and education relating to proper maintenance and care of septic systems, and support them in achieving compliance with septic code. The project will illustrate the potential for further implementation of a sewer system throughout this residential area. The RECIPIENT will partner with the JCCD to develop a Chimacum Watershed Management and Restoration Plan to protect and improve water quality throughout the watershed.

The obligation of the RECIPIENT to repay the loan from the sources identified below and to perform and observe all other agreements and obligations on its part, contained herein, shall be absolute and unconditional, and shall not be subject to diminution by setoff, counterclaim, or abatement of any kind. In addition, if this loan is also secured by Utility Local Improvement Districts (ULID) Assessments, this loan shall constitute

Agreement No: WQC-2023-JeCoPH-00032
Project Title: Chimacum-Port Hadlock Pollution Identification and Correction Project

a lien upon ULID Assessments in the ULID prior and superior to any other charges whatsoever.

5. Other Sources of Repayment. The RECIPIENT may repay any portion of the loan from any funds legally available to it.

6. Defeasance of the Loan. So long as ECOLOGY shall hold this loan, the RECIPIENT shall not be entitled to, and shall not affect, an economic Defeasance of the loan. The RECIPIENT shall not advance refund the loan.

Failure to repay the Loan Amount plus interest within the time specified in ECOLOGY's notice to make such repayment shall incur Late Charges and shall be treated as a Loan Default.

7. Refinancing or Early Repayment of the Project. So long as ECOLOGY shall hold this loan, the RECIPIENT shall give ECOLOGY thirty days written notice if the RECIPIENT intends to refinance or make early repayment of the loan.

Method and Conditions on Repayments

1. Semiannual Payments. Notwithstanding any other provision of this agreement, the first semiannual payment of principal and interest on this loan shall be due and payable no later than one year after the project completion date or initiation of operation date, whichever comes first.

In lieu of mailing payments, electronic fund transfers can be arranged by working with ECOLOGY's Financial Manager.

No change to the amount of the semiannual principal and interest payments shall be made without a mutually signed amendment to this agreement. The RECIPIENT shall continue to make semiannual payments based on this agreement until the amendment is effective, at which time the RECIPIENT's payments shall be made pursuant to the amended agreement.

2. Late Charges. If any amount of the Final Loan Amount or any other amount owed to ECOLOGY pursuant to this

Any prepayments on the loan shall be applied first to any accrued interest due and then to the outstanding principal balance of the Loan Amount. If the RECIPIENT elects to prepay the entire remaining unpaid balance and accrued interest, the RECIPIENT shall first contact ECOLOGY's Revenue/Receivable Manager of the Fiscal Office.

K. Loan Security

Due Regard: For loans secured with a Revenue Obligation: The RECIPIENT shall exercise due regard for Maintenance and Operation Expense and the debt service requirements of the Senior Lien Obligations and any other outstanding obligations pledging the Gross Revenue of the Utility, and it has not obligated itself to set aside and pay into the loan Fund a greater amount of the Gross Revenue of the Utility than, in its judgment, shall be available over and above such Maintenance and Operation Expense and those debt service requirements.

Where collecting adequate gross utility revenue requires connecting additional users, the RECIPIENT shall require the sewer system connections necessary to meet debt obligations and expected operation and maintenance expenses.

Levy and Collection of Taxes (if used to secure the repayment of the loan): For so long as the loan is outstanding, the RECIPIENT irrevocably pledges to include in its budget and levy taxes annually within the constitutional and statutory tax limitations provided by law without a vote of its electors on all of the taxable property within the boundaries of the RECIPIENT in an amount sufficient, together with other money legally available and to be used therefore, to pay when due the principal of and interest on the loan, and the full faith, credit and resources of the RECIPIENT are pledged irrevocably for the annual levy and collection of those taxes and the prompt payment of that principal and interest.

Not an Excess Indebtedness: For loans secured with a general obligation pledge or a general obligation pledge on special assessments: The RECIPIENT agrees that this agreement and the loan to be made do not create an indebtedness of the RECIPIENT in excess of any constitutional or statutory limitations.

Pledge of Net Revenue and ULID Assessments in the ULID (if used to secure the repayment of this loan): For so long as the loan is outstanding, the RECIPIENT irrevocably pledges the Net Revenue of the Utility, including applicable ULID Assessments in the ULID, to pay when due the principal of and interest on the loan.

This applies to the construction, alteration, and repair of treatment works carried out, in whole or in part, with assistance made available by the State Revolving Fund as authorized by Section 513, title VI of the Federal Water Pollution Control Act (33 U.S.C. 1372). Laborers and mechanics employed by contractors and subcontractors shall be paid wages not less often than once a week and at rates not less than those prevailing on projects of a character similar in the locality as determined by the Secretary of Labor.

The RECIPIENT shall obtain the wage determination for the area in which the project is located prior to issuing requests for bids, proposals, quotes or other methods for soliciting contracts (solicitation). These wage determinations shall be incorporated into solicitations and any subsequent contracts. The RECIPIENT shall ensure that the required EPA contract language regarding Davis-Bacon Wages is in all contracts and sub contracts in excess of \$2,000. The RECIPIENT shall maintain records sufficient to document compliance with the Davis-Bacon Act, and make such records available for review upon request.

The RECIPIENT also agrees, by signing this agreement, to comply with State Prevailing Wages on Public Works, Chapter 39.12 RCW, as applicable. O. Progress Reports: RECIPIENTS funded with State Revolving Fund Loan or Forgivable Principal shall include the following verification statement in the “General Comments” text box of each progress report.

“We verify that we are in compliance with all the requirements as outlined in our funding agreement(s) with the Department of Ecology. This includes but is not limited to:

The facilities or property transferred are not material to the operation of the funded Utility, or have become unserviceable, inadequate, obsolete, or unfit to be used in the operation of the funded Utility or are no longer necessary, material, or useful to the operation of the funded Utility; or
2. The aggregate depreciated cost value of the facilities or property being transferred in any fiscal year comprises no more than three percent of the total assets of the funded Utility; or
3. The RECIPIENT receives from the transferee an amount equal to an amount which will be in the same proportion to the net amount of Senior Lien Obligations and this LOAN then outstanding (defined as the total amount outstanding less the amount of cash and investments in the bond and loan funds securing such debt) as the Gross Revenue of the funded Utility from the portion of the funded Utility sold or disposed of for the preceding year bears to the total Gross Revenue for that period.
4. Expressed written agreement by the ECOLOGY.

2. For Failure to Commence Work. ECOLOGY may terminate this loan agreement for failure of the RECIPIENT to commence project work.

3. Past Due Payments. The RECIPIENT shall be in default of its obligations under this loan agreement when any loan repayment becomes 60 days past due.

4. Other Cause. The obligation of ECOLOGY to the RECIPIENT is contingent upon satisfactory performance in full by the RECIPIENT of all of its obligations under this loan agreement. The RECIPIENT shall be in default of its obligations under this loan agreement if, in the opinion of ECOLOGY, the RECIPIENT has unjustifiably failed to perform any obligation required of it by this loan agreement.

If this loan agreement is terminated prior to project completion, ECOLOGY shall provide to the RECIPIENT a written notice of termination at least five working days prior to the effective date of termination (the "Termination Date"). Termination and Default Remedies

No Further Payments. On and after the Termination Date, or in the event of a default event, ECOLOGY may, at its sole discretion, withdraw the loan and make no further payments under this agreement.

Repayment Demand. In response to an ECOLOGY initiated termination event, or in response to a loan default event, ECOLOGY may at its sole discretion demand that the RECIPIENT repay the outstanding balance of the Loan Amount and all accrued interest.

Interest after Repayment Demand. From the time that ECOLOGY demands repayment of funds, amounts owed by the RECIPIENT to ECOLOGY shall accrue additional interest at the rate of one percent per month, or fraction thereof.

Accelerate Repayments. In the event of a default, ECOLOGY may, in its sole discretion, declare the principal of and interest on the loan immediately due and payable, subject to the prior lien and charge of any outstanding Senior Lien Obligation upon the Net Revenue. That is, the loan is not subject to acceleration so long as any Senior Lien Obligations are outstanding. Repayments not made immediately upon such acceleration will incur Late Charges.

Late Charges. All amounts due to ECOLOGY and not paid by the RECIPIENT by the Termination Payment Date or after acceleration following a default event, as applicable, shall incur late charges.

Intercept State Funds. In the event of a default event and in accordance with Chapter 90.50A.060 RCW, "Defaults," any state funds otherwise due to the RECIPIENT may, at ECOLOGY's sole discretion, be withheld and applied to the repayment of the loan.

Property to ECOLOGY. In the event of a default event and at the option of ECOLOGY, any personal property (equipment) acquired under this agreement may, in ECOLOGY's sole discretion, become ECOLOGY's property. In that circumstance,

Fees and Expenses. In any action to enforce the provisions of this agreement, reasonable fees and expenses of attorneys and other reasonable expenses (including, without limitation, the reasonably allocated costs of legal staff) shall be awarded to the prevailing party as that term is defined in Chapter 4.84.330 RCW.

Damages. Notwithstanding ECOLOGY's exercise of any or all of the termination or default remedies provided in this agreement, the RECIPIENT shall not be relieved of any liability to ECOLOGY for damages sustained by ECOLOGY and/or the state of Washington because of any breach of this agreement by the RECIPIENT. ECOLOGY may withhold payments for the purpose of setoff until such time as the exact amount of damages due ECOLOGY from the RECIPIENT is determined.

T. User-Charge System for Funded Utilities: The RECIPIENT certifies that it has the legal authority to establish and implement a user-charge system and shall adopt a system of user-charges to assure that each user of the funded utility shall pay its proportionate share of the cost of operation and maintenance, including replacement during the design life of the project. The user-charge system will include provisions for a connection charge.

In addition, the RECIPIENT shall regularly evaluate the user-charge system, at least annually, to ensure the system provides adequate revenues necessary to operate and maintain the funded utility, to establish reserves to pay for replacement, and to repay the loan.
